```
> #This code reads in the Car Mileage Data Set. It then finds
```

```
> #the mean, median, and mode for the miles per gallon,
```

```
> #regardless of country. Finally, the mean, median, and mode
```

```
> #are calculated for MPG of both countries separately.
```

```
>
```

```
> #reading in CSV data set
```

```
> mpg<-read.csv("Car Mileage.csv")
```

```
> mpg
```
